Figma, Adobe Products, Design Systems

ABOUT ME

I'm a Frontend Software Developer and Product Designer with experience building internal tools, PWAs, customer products and websites. I specialize in crafting responsive, accessible user interfaces and bringing designs to life from concept to code. I'm passionate about clean code, intuitive user flows and thoughtful design execution.

EXPERIENCE

SOFTWARE ENGINEER | PRODUCT DESIGNER

Mass Virtual | February 2021 - Present

- Led frontend development for tools used in military training using Next.js, **Vue**, and TypeScript. Designed with **Figma**, built components/responsive UIs with Tailwind CSS/ShadCN
- Designs featured in marketing and training visuals/videos at tradeshows like I/ITSEC
- Managed and customized the company W**ordPress** site and built new templates using **NuxtJS**
- Worked closely with VR team to develop virtual training tools

FRONTEND WEB DEVELOPER

Guideline Central | June 2018 - February 2021

- Maintained the main W**ordPress** site and supported users
- Designed flow/mockups for an internal publishing application for healthcare guidelines and medical societies
- Developed the front-end from my designs using **Java Spring**, **Sass** and **Bootstrap**
- Some experience with building components in **React**
- Tech support for customers

SEO INTERN | WEB DEVELOPER CONTRACTOR

ROAR! Internet Marketing | August 2016 - May 2018

- Handled local search, SEO, Google Analytics & Adwords
- Updated web content in **ASP.NET** and WordPress
